Specification

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, if any

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, if **any**, should be updated in a timely manner.

Applicants are reminded of their duty to disclose information relevant to the prosecution of this application. This includes copending PCT applications.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: Non-initialed and/or non-dated alterations have been made to the oath or declaration by inventor Anderson. See 37 CFR 1.52(c).

Claim Rejections - 35 USC § 102

Application/Control Number: 10/763,463

Art Unit: 1755

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that

Application/Control Number: 10/763,463

Art Unit: 1755

the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-32 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 5,807,458 to Sanders et al.

The instant claims are drawn to reinforcing elements for cement compositions and methods for improving the properties of cement by addition of these components to cement. The patented invention teaches reinforcing compositions by using elements maintained in alignment with a dispersible containment means, which is considered to anticipate the herein claimed invention. See particularly columns 1-4, 7 and 8.

Claims 1, 4, 5, 13, 14, 15, 18, 19, 24, 25, 29 and 30-32 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 00/49211.

The instant claims are drawn to reinforcing elements for cement compositions and methods for improving the properties of cement by addition of

Art Unit: 1755

these components to cement. The patented invention teaches reinforcing compositions by using a plurality of fibers maintained by binding means, which is considered to anticipate the herein claimed invention. See particularly pages 5-8 and the claims.

Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,807,458 to Sanders et al..

The claims lack an inventive step for the same reasons set forth herein above regarding the lack of novelty. A lack of novelty is the epitome of lacking an inventive step.

Claims 1, 4, 5, 13, 14, 15, 18, 19, 24, 25, 29 and 30-32 lack an inventive step under PCT Article 33(3) as being obvious over WO 00/49211.

The claims lack an inventive step for the same reasons set forth herein above regarding the lack of novelty. A lack of novelty is the epitome of lacking an inventive step.

. Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.

Art Unit: 1755

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth D. Wood whose telephone number is 571-272-1377. The examiner can normally be reached on M-F, 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell can be reached on 571-272-1364. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-
